- Minimum clearances of 50mm at the bottom and 150mm at the top required

Offline

- Cable is approximately 1.2m in length and exits the rear right hand side of the unit
- Finished off superbly with rounded top and bottom edges

The ADAX Neo is the Norwegian firms flagship heater, incredibly popular thanks to it’s blend of quality, reliability and efficiency with a simple, slim and attractive design. The Neo remains our most popular convection heater, with more than 2000 eBay sales to date.

The understated front panel houses a small, bright & legible LED-display. Side panel controls allow you to modify the temperature and boost controls – this can also be achieved wirelessly when paired with our PR-1 fully programmable wireless controller which features a 24/7 Wireless Timer & Temp Controls and temperature presets for complete peace of mind (sold separately) – simply set and forget and enjoy the automated control.

The Neo is produced for the predominantly electric Norwegian market where the market demands reliability and performance. This award-winning heater provides warmth for thousands in some of the coldest conceivable climates.

Model	Power, W	Dimensions, mm	Heated Space, m ²	Weight, kg
